

5TH ANNUAL

G10

SUMMIT

SNAPSHOT

POTOMAC OFFICERS CLUB

BACKGROUND

Information technology is the backbone of nearly every federal operation in the digital age, and optimizing IT systems can provide many important benefits for government agencies. Reaping the rewards of modernization requires new technologies and new strategies, such as artificial intelligence or zero trust, and the public sector is working tirelessly to adopt these transformative techniques.

CONTRACT OPPORTUNITIES

The Mission Engineering organization with the **Cybersecurity and Infrastructure Security Agency** is offering a contract for management and analytical services with a potential value of over **\$100 million**. Under the contract, the selected provider will support areas such as operations and administration; financial management; and procurement and contract management. The contractor will also help CISA research and evaluate systems required by the government.

The **U.S. Army's** ongoing Understanding IT Enterprise Solutions - 4 Service contract aims to procure cutting-edge technology from industry to support IT systems. This multiple-award, indefinite-delivery/indefinite-quantity contract vehicle covers the areas of automation, cloud, business process reengineering, cybersecurity services and more. The total ceiling value is **\$12.1 billion**.

The **Department of Energy** is currently using its CIO Business Operation Support Services contract vehicle to obtain IT transformation services from several contractors. Specific focus areas include infrastructure and shared services, cybersecurity, general IT support and telecommunications.

NETWORKING OPPORTUNITIES

OVER 100 COMPANIES WILL BE ATTENDING THE EVENT.

OF REGISTERED ATTENDEES...

CLOSING KEYNOTE

WHAT THE KEYNOTES ARE SAYING

For '24 ... what I see us doing around modernization and where my head is focused is taking cloud to the next level.

Leslie Beavers / *GovCIO Defense IT Summit*

Zero trust presents a unique opportunity to comply-to-connect.

Doug Cossa / *Potomac Officers Club's 9th Annual Intel Summit*

While our community is excited about all the benefits, opportunities and capabilities that operating in a multi-cloud environment brings, we are also concerned about the additional cybersecurity risks.

Dr. Adele Merritt / *Potomac Officers Club's 4th Annual CIO Summit*

How do we partner, particularly with the mission side, to ensure that we're delivering systems that they can utilize, and also giving them enough freedom to operate the way that they need to? They have to adapt as quickly as the adversary, so some of the old ways of always saying no won't necessarily work for them."

Robert Costello / *FCW Insider Chat Podcast*

Modernization never ends. We still have to examine those upgrades, understand what they are and make sure they don't change our security posture, make sure they meet our users' needs, and ultimately, you have to look at whether you have the right products in your ecosystem.

Ann Dunkin / *Fed Gov Today Interview*

[We are] thinking about how [AI] applies to cybersecurity. How does it apply to intelligence? How does it apply to our warfighting capabilities?

Lt. Gen. Robert Skinner / *Armed Forces Communications & Electronics Association International's TechNet Cyber Conference*

POTOMAC OFFICERS CLUB

Potomac Officers Club members get exclusive access to even more information before our summits. To view the full version of this packet, which includes an expanded list of current contract opportunities, relevant news and budget information as well as a look into the event's panel topics, join the Potomac Officers Club today!
